PROJECTS

Expense Tracker | MERN

- Developed a responsive Expense Tracker using React.js, Redux, Node.js, Express, and MongoDB. Enabled users to analyze monthly/yearly financial data and track income, expenses, and balance.
- Implemented transaction addition functionality with persistent storage in MongoDB.Provided categorized financial tracking with smooth UI updates for better user experience.

Chat app | MERN

- Engineered a real-time chat web application using the MERN stack (MongoDB, Express.js, React, Node.js) and Socket.IO, enabling users to create and join distinct chat rooms for communication
- Designed and implemented a database structure in MongoDB to store and manage chat room details,facilitating the dynamic creation of new rooms and seamless entry into existing ones.

Blog website | Larvel & Mysql

- Developed a responsive blog website using Laravel, MySQL, Blade, and Bootstrap, featuring categorized blog posts stored in a MySQL database
- Implemented a user interface with Blade templates and Bootstrap for a visually appealing and adaptable experience across various devices
